

Alan D'Almeida Lins

Senior Software Engineer | Fullstack | Software Architecture | Applied AI

+55 81 99750-7405 · alan.v.lins@gmail.com · linkedin.com/in/alan-v-lins · Recife, Pernambuco, Brasil

Professional Summary

Software Engineering Specialist and Software Architect with 15+ years of experience across the full development cycle — from requirements gathering and architecture to production delivery — on small, medium and large-scale projects. A solid track record of technical growth (Developer → Senior → Tech Lead → Architecture) at companies such as Accenture, MV, Compass.UOL and Fundação CERTI, working as a Fullstack engineer (React, Angular, Node.js, Python/FastAPI, Java) with a focus on microservices architecture, event-driven systems (EDA) and cloud integration (Azure, AWS). Experience leading multidisciplinary squads under agile methodologies, with hands-on DevOps practice (CI/CD, containers, messaging) and an active interest in AI Engineering applied to real products. Currently at Capgemini, working in software architecture on a large-scale public-sector project (Java, Angular, Kafka, Oracle).

Professional Experience

Software Engineering Specialist / Architecture · Capgemini

2026 - atual — Recife, Pernambuco, Brasil (híbrido)

- Software architecture and development on a large-scale public-sector project, in a hybrid environment.
- Analysis of processes and the existing ecosystem to support architectural decisions.
- Stack: Java, Angular, Oracle, Apache Kafka, Apache Airflow, Jenkins and GitLab CI/CD.
- Quality practices: TDD, BDD and ATDD.
- Application of AI in the development cycle.

Software Developer / Tech Lead · Fundação CERTI

2023 - 2026 — Santa Catarina, Brasil (remoto)

- Worked as developer and tech lead on a Digital Twin project, building RESTful APIs in Python (FastAPI) and a React frontend, on an event-driven architecture (EDA) with RabbitMQ messaging.
- Led container deployment on internal servers (Portainer) and on client environments, covering development and testing cycles.
- Developed a solution for an innovation project using Python and AngularJS, following agile methodology with multidisciplinary teams.
- Worked with the Oracle, PostgreSQL, Databricks and Redis data stack to support delivered solutions.

Senior Systems Developer / Tech Lead · Compass.UOL

2020 - 2022 — Recife, Pernambuco

- Acted as Tech Lead in Node.js and React on the UOL group's EdTech project, coordinating the team's technical deliveries for 5 months.
- Developed the RaiaDrogasil e-commerce BFF in Node.js, NestJS and GraphQL, consuming the Magento2 core and microservices with MongoDB, Docker, RabbitMQ and Redis cache.
- Worked on an internal project for client RD using Node.js and AWS Lambda (serverless architecture).
- Conducted technical interviews and code-challenge reviews in Java Spring Boot and Node.js, contributing to the hiring process for new developers.

Software Developer · MV S/A

2014 - 2020 — Recife e Região, Brasil

- Maintained and evolved international business systems (hospital/healthcare ERP), with reports and screens in Java, Flex, HTML5, SCSS, TypeScript, Node.js, JPA and Hibernate.

- Took part in the Flex-to-HTML5 stack migration, including building a RESTful API in Node.js to convert XML documents to JSON.
- Joined the internal Framework and Technology team, developing reusable HTML5/TypeScript UI components adopted across multiple internal projects.
- Maintained PL/SQL (Oracle) objects and worked on fixes and rollout of a project with a Spring Boot backend and Vue.js frontend.
- Traveled to Peru for requirements gathering and feature development on an ERP system with an international client.

Software Engineer · Accenture Brasil

2013 - 2014 — Recife e Região

- Developed features for Natura and Mapfre client systems using Java, Spring MVC, Spring WebFlow, Struts/Tiles, JSF and WebLogic.
- Worked on-site in São Paulo, embedded with client Natura, for business requirements gathering and feature development.

Programming Intern · UFPE

2012 — Recife e Região

- Developed screens and modules for the internal ERP system Sig@ using Java, JSF, Hibernate and Oracle.

Education

Postgraduate degree in Software Engineering

Unibratec · 2015 - 2016

Associate degree in Systems Analysis and Development

Unibratec · 2010 - 2012

Technical degree in Electronics for Computerized Systems

Unibratec · 2008 - 2009

Technical Skills

Frontend: React, Angular, AngularJS, Vue.js, TypeScript, HTML5/SCSS

Backend: Node.js, NestJS, FastAPI, Java, Spring Boot, GraphQL

Architecture: Microservices, EDA, BFF, REST APIs

Data: PostgreSQL, Oracle, MongoDB, Redis, Databricks

Cloud & DevOps: Azure, AWS Lambda, Docker, CI/CD, RabbitMQ

Languages

Portuguese: Native

Spanish: Advanced

English: Intermediate
